Computer Guidance Corporation Announces eForms and Reports Archival Applications

Enterprise Content Management Solution Showcase At The 2011 Annual CFMA Conference & Exhibition

Scottsdale, Arizona – April 12, 2011 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today announced that it will release eForms and Reports Archival applications at the 2011 Annual CFMA Conference & Exhibition. The new eForms and Reports Archival functionality will grant Computer Guidance customers with significant benefits by reducing the expenses associated with filing and storing documents, providing instant access to the most current information, and saving time in retrieval and processing.

Computer Guidance customers will now have the ability to save images, documents, forms and eCMS reports without the need to scan and save files at multiple locations. Users will be able to assign electronic forms and reports to accounting records and business process workflows, placing digital documents within reach of all users and making digital documents a strategic resource for improved decision-making. There is no longer a need to resend the same digital document across multiple business applications to different users and for multiple purposes, the documents are automatically distributed and made available through the eForms and Reports Archival applications.

“Document archival capability is vital to the effectiveness of an organization’s electronic content management strategy.” states Kurt Bennett, Director of Product Development, Computer Guidance Corporation. “The recently announced enhancements to our Document Imaging and Workflow applications as well as the release of our Reports and eForms Archival applications will provide invaluable productivity tools to our customers and we look forward to their adoption of the solution.”

For additional information, visit the **Computer Guidance Booth #701-703 at the 2011 Annual CFMA Conference & Exhibition, on May 16-17, 2011, at the Gaylord Texan Resort, in Grapevine, Texas**.

About Computer Guidance Corporation
Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance’s eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering News-Record (ENR). Computer Guidance is a strategic technology partner with IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
