Computer Guidance Announces New eCMS 3.7® Customer – CVC Construction Co.

Scottsdale, Arizona – February 19, 2009 – Computer Guidance Corporation, the leading developer of financial and project management software solutions for the commercial construction industry, announced that CVC Construction Co. has joined the growing list of contractors making the move to the eCMS accounting solution to manage their rapidly growing business.

Headquartered in Rancho Cordova, California, with satellite offices in Fresno, Bakersfield, Camarillo, and Reno, Nevada, CVC Construction is one of the nation's largest concrete subcontractors. The company has earned the reputation as an industry leader for providing exceptional quality, dependability and on-schedule, on-budget delivery with a strong emphasis on safety. CVC Construction firmly believes that repeat business is predicated on "building relationships" and delivering consistent quality in a timely manner at a competitive price.

The eCMS 3.7 web interface applications from Computer Guidance Corporation provide CVC Construction Co. with solutions that will make the company more efficient, including fully automated capabilities for payroll and accounts receivable/billing systems that eliminate the need for manual input of data. The eCMS 3.7 suite combines 30 unified applications that will enable CVC Construction Co. to integrate its operational and financial systems. The company will take advantage of productivity tools such as document imaging, electronic workflow, and electronic forms management, all from the convenience of a web browser. CVC Construction will also employ Project Collaborator, a browser based solution that unifies project management efforts, allowing submittals, drawing logs, meeting minutes, punch lists and other status information be viewed, updated, and shared by all project and financial team members.

CVC Controller Frank Pickar states, "We selected Computer Guidance because of the value received relative to the functionality and price and because it met most of our internal system requirements. We look forward to working with the Computer Guidance system to meet our objectives.

Computer Guidance Business Development Manger Dave Suchomel adds, "CVC Construction Co. was looking for a job cost accounting and project management system that would allow it to take advantage of the efficiencies of maintaining both operational and financial information in a single database."

About Computer Guidance Corporation

Computer Guidance has the largest customer representation in the Engineering News Record (ENR) "Top 400 Contractors" and "Top 50 Contractors." Computer Guidance software has been the leading solution among General Contractors with revenue of more than 250-million dollars and 100-250-million dollars for the past twelve years according to the CFMA Information Technology Survey.

Since 1981, Computer Guidance has been the leading provider of financial accounting, project management, and bidding software to more than 600 enterprise customers from various commercial construction disciplines.
