T.A. Loving Company Upgrades To eCMS 3.7®

Solution Incorporates Computer Guidance Corporation's Order Processing, Equipment Maintenance, Project Collaborator Applications

Scottsdale, Arizona – June 4, 2009 – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced T.A. Loving Company's solution upgrade to eCMS 3.7. T.A. Loving Company, a long-time client of Computer Guidance Corporation, further enhanced its current technology solutions with the purchase of Computer Guidance's industry-leading Order Processing, Equipment Maintenance and Project Collaborator applications.

T.A. Loving Company is consistently ranked one of the nation's top 400 contractors, providing complete construction and pre-construction services for the general building, utility and bridge/heavy trades. T.A. Loving Company was founded in 1925 as a small bridge contractor, and has grown into one of the most highly reputable general contractors in North Carolina.

"We are looking forward to leveraging Computer Guidance's latest construction management software and operational efficiency tools in order to deliver upon our promise – striving to exceed our customers' expectations with quality products, value and expertise," said Al Grisette, Chief Financial Officer, T. A. Loving Company.

The browser-based eCMS 3.7 upgrade provides T.A. Loving Company with a user-friendly graphical user interface that delivers immediate and noticeable results in productivity and operational efficiency. This upgrade also features increased administrative flexibility and advanced security measures.

The database performance enhancements offer seamless and real-time integration with 28 ancillary Computer Guidance products, including Order Processing, Equipment Maintenance and Project Collaborator applications that T.A. Loving Company recently acquired. The addition of Project Collaborator, for example, provides significant competitive advantages to T.A. Loving in meeting tight deadlines and managing complex projects and remote field operations. While the Equipment Maintenance and Order Processing applications allow for specific cost management functions of fleet maintenance, internal jobs and customer orders, each application integrates with each other for real-time data exchange, advanced reporting and communication to facilitate optimum business operations.

About Computer Guidance Corporation

Computer Guidance has the largest customer representation in the Engineering News Record (ENR) "Top 400 Contractors" and "Top 50 Contractors." Computer Guidance software has been the leading solution among General Contractors with revenue of more than 250-million dollars and 100-250-million dollars for the past 12 years according to the CFMA Information Technology Survey.

Since 1981, Computer Guidance has been the leading provider of financial and project management solutions to more than 600 enterprise customers from various commercial construction disciplines. Computer Guidance continues to be ranked "World Class" in customer support excellence by independent IBM surveys for the past 20 years.
