Computer Guidance Welcomes Its First Hosted eCMS® Client

Successful Implementation of Hosted eCMS for Republic Investment Services, Inc.

Scottsdale, Arizona – October 13, 2009 – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced the first successful implementation of its Hosted eCMS solution for Republic Investment Services since introducing the SaaS (Software as a Service) solution in May of 2009.

Hosted eCMS provides fully-integrated, enterprise-class financial, project management and productivity enhancement applications in a managed hosted environment. Republic Investment Services now takes full advantage of Computer Guidance's Hosted eCMS solution suite, which is implemented and maintained at Avnet's Tier IV data center environment with guaranteed uptime coupled with advanced solution, application and system monitoring services.

"On-demand and ubiquitous access to an all-encompassing construction management solution without the need for a comprehensive IT infrastructure is what we were looking for" said Betty Wagner, Director of Operations, Republic Investment Services. "Computer Guidance Corporation's Hosted eCMS solution provides the tools we need to manage our business on a daily basis with reduced upfront IT expenditures. We chose the usage-based model as it scales up and down as our business demands it."

Hosted eCMS offers quicker implementation and seamless solution updates in a highly secure, yet remote data center environment. Both Avnet and Computer Guidance Corporation have full capabilities to monitor our clients' solutions on a 24/7/365 basis.

"In today's ever-changing business environment, software development companies must deliver flexible and scalable solutions to meet business demands", said Roger D. Kirk, CEO and President, Computer Guidance Corporation. "Hosted eCMS is just one of the many innovative solutions that we are introducing to the marketplace in 2009."

About Computer Guidance Corporation

Computer Guidance has the largest customer representation in the Engineering News Record (ENR) "Top 400 Contractors" and "Top 50 Contractors." Computer Guidance software has been the leading solution among General Contractors with revenue of more than 250-million dollars and 100-250-million dollars for the past 12 years according to the CFMA Information Technology Survey.

Since 1981, Computer Guidance has been the leading provider of financial and project management solutions to more than 600 enterprise customers from various commercial construction disciplines. Computer Guidance continues to be ranked "World Class" in customer support excellence by independent IBM surveys for the past 20 years.
