Computer Guidance Welcomes New Client – Wolf Construction, Inc.
Wolf Construction, Inc. Selects Hosted eCMS® Financial Management Solution

Scottsdale, Arizona – December 22, 2009 – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced that Wolf Construction, Inc., a premier industrial and commercial general contractor, has selected its Hosted eCMS solution for their financial accounting and business management needs.

Since the announcement of Computer Guidance Corporation's Hosted eCMS solution in the second quarter of 2009, Wolf Construction Inc., along with fifteen other SaaS (Software as a Service) contractors, have selected Hosted eCMS as their construction management solution of choice.

"Wolf Construction was looking for a comprehensive end-to-end financial and project management solution without a significant upfront IT investment" said Michael D. Schirmer, Chief Financial Officer, Wolf Construction, Inc. "Computer Guidance's eCMS as an industry-leading construction management software offered on a hosted platform consolidated all of our needs into a single chassis, and we are looking forward to its promising benefits."

"Software as a Service is part of the larger technology trend of cloud computing where solutions and services are made available over the Internet without the need for extensive IT infrastructure", said Roger D. Kirk, CEO and President, Computer Guidance Corporation. "Our current economic climate demands software companies to diversify their business models while continuing to focus on their core competencies."

Hosted eCMS provides a fully integrated, enterprise-class financial, project management and productivity enhancement solution suite in a managed environment with guaranteed uptime and advanced solution, applications and system monitoring services. With a hosted software model, companies not only eliminate upfront IT expenditures and onsite IT infrastructure, but they also have the ability to spread their software payments over time and adjust them as their business demands it for quicker return on investment.

About Computer Guidance Corporation

Computer Guidance has the largest customer representation in the Engineering News Record (ENR) "Top 400 Contractors" and "Top 50 Contractors." Computer Guidance software has been the leading solution among General Contractors with revenue of more than 250-million dollars

and 100-250-million dollars for the past 12 years according to the CFMA Information Technology Survey.

Since 1981, Computer Guidance has been the leading provider of financial and project management solutions to more than 600 enterprise customers from various commercial construction disciplines. Computer Guidance continues to be ranked "World Class" in customer support excellence by independent IBM surveys for the past 20 years.
