**Computer Guidance Corporation Releases Its Portal Application**

*Advanced Productivity Tool Integrated with eCMS Financial and Project Management Solution*

**Scottsdale, Arizona – March 11, 2010** – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, announced today the release of its Portal application, an advanced productivity tool integrated with its eCMS® construction management software suite.

A significant advance over a standard dashboard, the portal application uses web-based technology, which enables it to function as an internet portal with access to other internet sites. As a result, it not only launches the user's construction management application, it also drives third-party applications that can be launched from any Uniform Resource Locator (URL).

The Portal application also provides immediate access to data from any internet site, such as streaming video from a company's jobsite web cams or the most recent weather report. The user can configure the application to post alerts — for example, pertaining to budget or schedule — to the portal itself, e-mail, and/or text message. Users can configure the software with multiple columns for their applications.

"Our new Portal application puts the vast resources of the worldwide web at the fingertips of contracting executives, financial officers, and project managers," said Roger D. Kirk, President and CEO, Computer Guidance Corporation. "Immediate access to information helps them run their businesses more effectively and, ultimately, more profitably."

The Portal application is one of 28 integrated applications that are part of the Computer Guidance eCMS enterprise-class solution. The eCMS solution provides improved monitoring and analysis of not only financial, but also operating performance, with advanced functions for tracking subcontractor performance, document compliance and contract management.

**About Computer Guidance Corporation**

Computer Guidance has the largest customer representation in the Engineering News Record (ENR) "Top 400 Contractors" and "Top 50 Contractors." Computer Guidance software has been the leading solution among General Contractors with revenue of more than 250-million dollars and 100-250-million dollars for the past 12 years according to the CFMA Information Technology Survey.

Since 1981, Computer Guidance has been the leading provider of financial and project management solutions to more than 600 enterprise customers from various commercial construction disciplines. Computer Guidance continues to be ranked “World Class” in customer support excellence by independent IBM surveys for the past 20 years.
