Computer Guidance Launches Employee Self Service Human Resources Application
Introducing the First Phase of Its Human Resources Product Development Initiative

Scottsdale, Arizona – August 10, 2010 – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced the launch of its Employee Self Service Human Resources application which represents the first phase of its Human Resources product development initiative.

The Human Resources Employee Self Service application provides employees with the ability to manage their benefits, insurance, vacation and sick time, personal profile information, payroll, W2 information and more. Employees can conveniently make changes to their human resources information on demand in a highly secure environment with appropriate notifications to human resources, management and payroll personnel for immediate approval and processing.

“The Employee Self Service application is an important productivity tool for large organizations with thousands of employees.” stated Greg Hesser, Chief Financial Officer, Alberici Corporation. “Upon completion, the Four-phase Human Resources product development initiative will award Computer Guidance with the most comprehensive human resources solution in the industry.”

The Human Resources Initiative contains four development phases with advanced and industry-first functionality meeting construction companies’ human capital management needs. The Human Resources Initiative includes training, certification, safety, performance, incentive, compensation, recruiting, benefits, personnel management, succession planning, career and employee development, and much more.

“The Human Resources Initiative is a result of joint collaboration with our customers and it supports our corporate strategy of partnering with our customers for mutual success.” stated Roger D. Kirk, President/CEO, Computer Guidance Corporation. “This solution introduction and continued development efforts demonstrate our long-term commitment to be the leader in delivering innovative construction management solutions for years to come.”

About Computer Guidance Corporation

Computer Guidance has the largest customer representation in the Engineering News Record (ENR) “Top 400 Contractors” and “Top 50 Contractors.” Computer Guidance software has been the leading solution among General Contractors with revenue of more than 250-million dollars and 100-250-million dollars for the past 12 years according to the CFMA Information Technology Survey.

Since 1981, Computer Guidance has been the leading provider of financial and project management solutions to more than 600 enterprise customers from various commercial construction disciplines. Computer Guidance continues to be ranked “World Class” in customer support excellence by independent IBM surveys for the past 20 years.
