Computer Guidance Corporation Unveils Next Generation of Document Imaging
Enterprise Content Management Showcase At The 2011 Annual CFMA Conference & Exhibition

Scottsdale, Arizona – April 14, 2011 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today announced that it will unveil a new, significantly enhanced version of its Document Imaging application at the 2011 Annual CFMA Conference & Exhibition. As part of an overall enterprise content management strategy, Document Imaging application will automate the management of complex, business-critical documents for even greater productivity and operational efficiency.

Document Imaging has been enhanced to include advanced role-based security and to simplify working with complex, multi-page documents. The advanced security features will endow contractors with greater control over document access and routing by establishing role-based security. In addition, increased flexibility for importing, managing and archiving of documents and image files with dynamic indexing capabilities drive higher efficiencies and increased automation.

"With the added flexibility of being able to manage and update imaged documents on demand, we have taken a big step forward to offering our customers a complete enterprise content management solution." explains Kurt Bennett, Director of Product Development, Computer Guidance Corporation. "Our customers demand solutions that drive productivity improvements across the enterprise and with the new Document Imaging application we are responding to their needs."

For additional information, visit the **Computer Guidance Booth #701-703 at the 2011 Annual CFMA Conference & Exhibition, on May 16-17, 2011, at the Gaylord Texan Resort, in Grapevine, Texas**.

About Computer Guidance Corporation
Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance's eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering News-Record (ENR). Computer Guidance is a strategic technology partner with IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
