**Computer Guidance Corporation Releases New Workflow Application**

*Enterprise Content Management Showcase At The 2011 Annual CFMA Conference & Exhibition*

Scottsdale, Arizona – April 19, 2011 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today announced that it will release a new and extensively enhanced version of its Workflow application at the 2011 Annual CFMA Conference & Exhibition. As part of an overall enterprise content management strategy, the Workflow application will provide improved flexibility and increased business process automation for its customers.

With a new look and feel and enriched functionality, Computer Guidance customers will have the ability to drag and drop files within applications supported by pop-up screens for workflow approvals and daily document processing. The new graphical user interface will go even further with common toolbar icons on all screens providing access to common functions across all applications, saving time and effort.

This release will introduce the capability to start new workflows in one application and reroute the document to another application, driving improved communication and streamlined business processes across the organization. Users will be able to view where documents are within workflow and track activity through the included history logs.

“Workflow management continues to be a critical component to our customers’ effectiveness and efficiency and the supporting technology solution must provide the needed flexibility to quickly respond to daily business needs and at the same time, allow for continuous process improvements.” comments Kurt Bennett, Director of Product Development, Computer Guidance Corporation. “Our customers need innovative workflow solutions to optimize company-wide communication, information sharing and business process administration.”

For additional information, visit the **Computer Guidance Booth #701-703 at the 2011 Annual CFMA Conference & Exhibition, on May 16-17, 2011, at the Gaylord Texan Resort, in Grapevine, Texas.**

**About Computer Guidance Corporation**

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance’s eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering News-Record (ENR). Computer Guidance is a strategic technology partner with IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
