Luhr Bros, Inc. Selects Hosted eCMS Solution

For Improved Efficiency and Productivity Across The Organization

Scottsdale, Arizona – May 24, 2011 – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced that Luhr Bros., Inc., one of the largest heavy highway contractors in the United States working directly with the U.S. Army Corps of Engineers, has selected Computer Guidance's Hosted eCMS to improve operational efficiency, productivity and company-wide collaboration.

Luhr Bros., Inc. has been recognized as one of the top river-related construction companies in the nation with an extensive company-owned network of towboats, barges, stone placement machinery and land-based equipment, offering specialized services in levee building, stone placement, dredging, cofferdam construction, and excavating.

"Luhr Bros, Inc. has multiple locations dispersed across the Midwest and Southern states, and the solution's ability to provide accurate, up-to-date and integrated financial and project data across the organization was a critical factor in our decision." said Sheryl Metzger, Chief Financial Officer, Luhr Bros., Inc. "We selected Hosted eCMS for the automation and integration of our business processes across our locations without having extensive on-site IT support."

"The demand for increased productivity and efficiency continues to climb," stated Roger D. Kirk, President and CEO of Computer Guidance Corporation. "Contractors are challenged to optimize resource and equipment utilization, increase productivity and reduce operating costs while continually improving profitability. The construction industry has demonstrated the need to automate business processes, and our increased solution placements demonstrate how well our integrated construction financial and project management solution meets the needs of customers."

About Computer Guidance Corporation

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance's eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering News-Record (ENR). Computer Guidance is a strategic technology partner with IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
