**Cold Spring Construction Co. Selects Hosted eCMS**  
*Computer Guidance Customer Expands Partnership*

Scottsdale, Arizona – August 25, 2011 – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced that Cold Spring Construction Co. signed an agreement to implement Hosted eCMS for the management of its heavy highway and civil engineering projects in western New York and northern Pennsylvania.

Since its start in 1911, Cold Spring Construction Co. has been a leader in road and bridge construction and has expanded its business to include dams and other work with the Corps of Engineers. With a focus on excavation and paving, Cold Spring Construction Co. utilizes Computer Guidance's eCMS solution to manage their financials, projects and equipment.

"We have been relying on Computer Guidance's construction management solutions to manage our complex business needs since 1999 and couldn't be happier with the capabilities and performance of the solution." said Richard Forrestel Jr., Treasurer, Cold Spring Construction Co. "The move to Hosted eCMS is a natural growth for our business, providing greater flexibility and easier access to our project and financial information while keeping every transaction secure."

"Our Hosted eCMS solution offers customers, both new and long-term, an alternative to traditional, on-premise solutions while still providing the same feature-rich enterprise-class software," said Roger D. Kirk, President/CEO, Computer Guidance Corporation. "By allowing us to take over the management and maintenance of their hardware and software, our customers are receiving the benefits of a reliable, comprehensive construction management solution without the need to invest heavily in IT infrastructure and staffing."

**About Computer Guidance Corporation**

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance's eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering-News Record (ENR). Computer Guidance is a strategic technology partner with IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
