**E.E. Reed Construction, L.P. Selects Hosted eCMS**  
*Computer Guidance Customer Expands Partnership*

Scottsdale, Arizona – September 6, 2011 – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced that E.E. Reed Construction, L.P. signed an agreement to implement Hosted eCMS for the management of its design/build and general contracting services with offices in Arizona, California, Texas and Virginia and projects in 14 states.

Since its foundation as a general contractor in 1976, E.E. Reed Construction, L.P. has expanded its construction services offerings through acquisitions and partnerships. Today, E.E. Reed Construction provides general construction services for a wide array of industries, including education, government, healthcare, residential, institutional, corporate real estate, parking, religious offices, retail, industrial and more.

“As an organization with hundreds of employees spread out across many locations, we truly rely on our software solutions to effectively communicate and coordinate our activities while serving our clients in a timely manner and with the highest quality,” said Mike Den Herder, CFO, E.E. Reed Construction, L.P. “We selected Hosted eCMS and Project Collaborator to help us centralize our business-critical project information and activities.”

“Our enterprise resource planning solution is more than just an accounting application. eCMS provides an integrated construction management solution with comprehensive collaboration and communication tools.” said Roger D. Kirk, President/CEO, Computer Guidance Corporation. “And now with our robust managed hosting solutions, our customers can optimize their operations without significant investments in their IT infrastructure.”

**About Computer Guidance Corporation**

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance’s eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering-News Record (ENR). Computer Guidance is a strategic technology partner with IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
