**Motor City Electric Co. Receives Silver Constructech Vision Award**  
*Computer Guidance And Its Client Recognized For Their Achievements*

**Scottsdale, Arizona – September 20, 2011** – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced that its client, Motor City Electric Co., was recognized last week as a silver recipient at the 2011 *Constructech* Vision Awards at Drury Lane, in Oakbrook Terrace, Illinois.

Motor City Electric Co. is a full-service electrical contractor based in the State of Michigan with nine separate operating divisions within the company: Automotive and Process, Commercial, Industrial, Specialty Industries, Service and Emergency, Public Works and Steel, Networking Technologies and Controls, Power Transmission and Distribution and Excavation. Motor City Electric Co., with over 50 years of experience, was recognized last week in the *Specialty Contractor: Electrical Work* category for its outstanding performance and innovative application of Computer Guidance's eCMS construction management solution.

Motor City Electric Co. is contracted with the Cobo Center as the electrical contractor for all of their tradeshows and overall facility needs. One of the most recognized events is the well-known annual North American International Auto Show. Motor City Electric Co. is able to track job costs, time and material, and payroll for multiple customers broken down per a single exhibiting area or booth space. Each booth or exhibiting space is tied to a separate electrical contract and associated costs, including time and material. This is made possible through the use of Computer Guidance's eCMS core financials and Time & Material Billing application, allowing Motor City Electric Co. to secure profit margin on each exhibiting area/ticket as well as accurately and timely invoice customers per exhibiting area on a weekly basis.

"One topic that you will hear throughout the construction marketplace is the idea of collaboration. And, the winners of the Vision Awards epitomize this growing trend," says Peggy Smedley, editorial director, *Constructech* magazine. "These companies have found success, and that can be seen throughout the organization, from increased ROI, to employee efficiency, and so much more. Congratulations to each of the winners, on both the success they have achieved, and their determination to let collaboration lead them to it."

"We are pleased to be recognized as a Vision Award winner for our continued efforts in utilizing innovative and advanced technologies for improved operational efficiency and greater client satisfaction." said Patrick Mitchell, Controller, Motor City Electric Co. "With the help of solutions such as Computer Guidance's eCMS construction management solution, we will be able to

continue to offer our customers the high level of quality performance and service that they have come to expect.”

**About Computer Guidance Corporation**

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance’s eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering-News Record (ENR). Computer Guidance is a strategic technology partner with IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
