Computer Guidance Corporation Launches eCMS v.4.0

Introducing the Next Generation of Computer Guidance's Enterprise Resource Planning Solution

Scottsdale, Arizona – October 3, 2011 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today announced the general availability of its latest construction enterprise resource planning solution—eCMS v.4.0.

eCMS v.4.0, developed in collaboration with Computer Guidance customers, continues to bring to market the most complete, proven and reliable construction management solution. eCMS v.4.0 introduces groundbreaking features and functionality that respond to the dynamic demands of the construction industry. With significant solution architecture changes and comprehensive enterprise-class security configuration, eCMS v.4.0 accommodates advanced financial transaction processing, management and reporting that is scalable to meet the needs of construction companies.

eCMS v.4.0 also introduces new productivity tools, including enterprise content management and flexible user navigation. Additional functionality for the benefit of operations and project management teams includes enriched applications for order control and inventory management, plant sales, bill of materials, and purchasing. Advances to Computer Guidance's Business Intelligence solution, include Cognos Business Intelligence and the addition of Management Report Writer to complement our Financial Report Writer.

"The ever-changing landscape of the construction industry demands more from our customers and in order to stay competitive we had to considerably transform our solution." states Roger D. Kirk, President and CEO, Computer Guidance Corporation. "Visibility into all aspects of the operation, convenient access and dynamic presentation of business-critical information, enterprise-wide collaboration and communication, and business process efficiencies were some the key drivers of our product development efforts."
