Brim Construction Group, Inc. Selects Hosted eCMS

Computer Guidance's Cloud-based Solution For Business-critical Applications

Scottsdale, Arizona – January 31, 2012 – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced that Brim Construction Group, Inc. has selected Computer Guidance's cloud-based solution for its construction financial and project management needs.

Brim Construction Group, headquartered in Mobile, Alabama, performs commercial and industrial plumbing and piping construction work in the states of Alabama, Florida and Mississippi. Brim Construction has been a Computer Guidance customer since 1998 and recently the company has decided to upgrade its legacy system to Computer Guidance's cloud-based Hosted eCMS in support of their growing business.

"Our decision was based on the rich feature set that Hosted eCMS offers as well as its on-demand and uninterrupted application availability in the cloud" said Sharon Parlier, Vice President, Brim Construction Group. "The migration to Hosted eCMS was seamless and we look forward to leveraging Hosted eCMS in its secure and flexible infrastructure, helping us serve our customers better while enabling us to grow."

"Construction financial accounting, job costing and project management applications play a critical role in the day-to-day business operations of construction companies, demanding a flexible and reliable infrastructure for quick and accurate processing." said Roger D. Kirk, President and CEO, Computer Guidance Corporation. "Computer Guidance's cloud-based solution will drive improved billing, payroll processing and financial reporting for Brim Construction Group in a managed hosted IT infrastructure."

Hosted eCMS provides an integrated construction financial and project management software solution with advanced productivity and innovative business intelligence capability in a managed environment with guaranteed uptime. The cloud-based solution offers advanced solution, applications and system monitoring services that minimizes the impact of implementing a new solution on existing IT resources while leveraging a stable and reliable IBM platform.

About Computer Guidance Corporation

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance's eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering News-Record (ENR). Computer Guidance is a strategic technology partner with IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
