

Computer Guidance Corporation Launches Mobile eCMS

Payroll Time Entry, Field Reporting and Time & Attendance Applications to Increase Field Productivity

Scottsdale, Arizona – October 23, 2012 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today launched its Mobile eCMS solution for Apple iPad and iPhone devices.

Mobile eCMS falls in line with Computer Guidance's product strategy delivering integrated enterprise applications enabling its customers to improve productivity, efficiency and collaboration. The comprehensive Mobile eCMS application suite allows management to oversee field activities while bringing immediate productivity gains to the field workforce with real-time data entry and management.

The Remote Payroll, Field Reporting and Time & Attendance applications are designed for the construction industry, facilitating the collection of data for field entry of labor, equipment units and production quantities through convenient and easy-to-use applications.

"Mobile eCMS will change the way our customers manage their daily operations and bring a closer connection between field workforce and the team in the office." stated Roger D. Kirk, Chief Executive Officer, Computer Guidance Corporation. "More and more of our customers are developing an enterprise mobility strategy and are embracing mobile technologies, and now with Mobile eCMS our customers can achieve their objectives."
