**The Associated General Contractors of America and Computer Guidance Corporation
Renew Strategic Partnership**

*AGC Endorses Computer Guidance as the Premier and Recommended Solution Provider for its
chapter and member community*

Scottsdale, Arizona – January 8, 2013 – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced the renewal of its strategic partnership with the Associated General Contractors of America (AGC), the leading national construction trade association of America. The AGC renewed its endorsement for Computer Guidance as the construction enterprise resource planning solution provider of choice for its member community through the AGC Affinity Program.

The strategic partnership was first established in 2010, providing AGC members access to Computer Guidance’s construction financial and project management solution for improved operational efficiencies and increased productivity with exclusive discount pricing. In the past two years, the two organizations have collaborated, both at individual chapter and corporate levels, to promote the use of technology within the construction industry through ongoing education and information-sharing.

“Thanks to our relationship with Computer Guidance, our members can easily access technology solutions designed to make them more efficient and more successful.” stated Chris Monek, senior executive director, business development, programs & industry relations of the Associated General Contractors of America. “This is the kind of partnership that underscores the value of belonging to the association.”

“We are pleased to be working with the AGC to help commercial contractors improve their business operations and the industry’s overall performance as a result of continued automation and innovation.” stated Roger D. Kirk, Chief Executive Officer, Computer Guidance Corporation. “Our mutual customers will continue to benefit from our efforts as we bring to market new technology improvements and augmented services.”

About Computer Guidance Corporation

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance’s eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering News-Record (ENR). Computer Guidance is a strategic technology partner with IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
