

Computer Guidance Corporation Achieves IBM Cloud Computing Specialty Certification
Construction Enterprise Resource Planning Provider Accepted into IBM Cloud Computing Specialty

Scottsdale, Arizona – January 22, 2013 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today announced it has achieved IBM Cloud Computing Specialty Certification which acknowledges Computer Guidance Corporation as a member of the IBM Cloud Computing Specialty.

The IBM Cloud Computing Specialty program consists of five solution areas for IBM Business Partners who demonstrate their expertise and client success in cloud computing. These areas include cloud application providers, cloud builders, cloud infrastructure providers, cloud services solution providers, and cloud technology providers. In order to qualify for this program, Computer Guidance Corporation was required to meet IBM criteria in application hosting, sales and technical skills, revenue, and client references.

The IBM Cloud Computing Specialty is designed to support IBM business partners with the full breadth of IBM's cloud capabilities, including software, systems, and services. Signaling another growth opportunity for the IT industry, a recent IBM developerWorks survey of more than 2,000 IT professionals worldwide showed that 91 percent believe cloud computing will overtake on-premise computing as the primary way organizations acquire IT by 2015.

“We have seen a tremendous growth with our Hosted eCMS solution and service offerings over the past years. Contractors look for on-demand and ubiquitous access to an all-encompassing construction management solution without the need for a comprehensive IT infrastructure.” stated Mike Bihlmeier, President, Computer Guidance Corporation. “Accomplishments such earning recognition as an IBM's Cloud Computing Specialty will continue to advance our cloud-based offerings.”

About Computer Guidance Corporation

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance's eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering News-Record (ENR). Computer Guidance is a premier business partner of IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
