

## **BRB Contractors, Inc. Goes Live on Hosted eCMS**

*eCMS Construction ERP Utilized to Manage General Contracting and Heavy Civil Engineering Business*

Scottsdale, Arizona – June 11, 2013 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today announced that BRB Contractors has gone live with Hosted eCMS® v.4.0, next generation of Computer Guidance's construction ERP deployed in a cloud-based environment.

"Our company has relied on Computer Guidance's construction management solutions for the past 29 years, and the comprehensive functionality of the eCMS system has been a cornerstone of our continuing success." said Darryl Shupe, Vice President of Finance, BRB Contractors, Inc. "When it was time to upgrade to the latest eCMS solution, we took into account hardware costs and how to better manage our resources and IT infrastructure. With Hosted eCMS, we have the new features and functionality while leaving the management and maintenance of our new system in the hands of our solution provider."

A long-term Computer Guidance customer, BRB Contractors worked hand in hand with Computer Guidance to migrate the organization from an on-premise legacy software version to the latest hosted ERP release. Due to an unexpected failure of the former IT infrastructure, the organizations had to quickly act to deliver a seamless transition under a tight and critical deadline. The migration effort was accomplished in three days as a result of extensive collaboration and communication.

"The Computer Guidance team took control of the situation we found ourselves in and worked diligently to get us up and running in the hosted environment as quickly and efficiently as possible." added Kathy Laird, Assistant Controller, BRB Contractors, Inc. "Computer Guidance's response to this incident has demonstrated their commitment to ensuring that business-critical applications remain available without interruption and that services are restored with minimal effort when the unforeseen occurs. Our partnership has been the right decision for our company and we are confident of continuing this relationship for the future."

"We were pleased with the collaborative effort of BRB Contractors project team who worked in tandem with our technical and professional services teams to ensure a seamless implementation under a short timeline." stated Michael Bihlmeier, President, Computer Guidance Corporation. "We continue to see strong demand for our cloud-based construction ERP solution and associated services, and it continues to remain an important component of our overall corporate strategy."

### **About Computer Guidance Corporation**

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance's eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010.
