

## **Clark Builders Commits to Hosted eCMS**

*On-Site Top 40 Canadian Contractor Embraces Cloud Strategy with Computer Guidance*

Scottsdale, Arizona – June 25, 2013 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today announced that Clark Builders has committed to Hosted eCMS® v.4.0, next generation of Computer Guidance’s construction ERP deployed in a cloud-based environment.

A long-term Computer Guidance customer, Clark Builders seeks to expand their use of eCMS to support their growth strategy while minimizing risk and adding functionality. The Edmonton-based general contractor will utilize eCMS Core Financial applications, Business Intelligence & Analytics and Project Collaborator along with a variety of standard productivity tools.

“The new version of eCMS provides the functionality that we have been seeking to support our financial and field operations, facilitating business process improvements across all of our locations.” stated Dean Doige, CIO, Clark Builders. “Moving our ERP to the cloud allows us to refocus our people on our core business of construction rather than supporting services.”

“We are pleased with the recommitment of Clark Builders and look forward to strengthening our collaborative partnership,” stated Michael Bihlmeier, President, Computer Guidance Corporation. “A functional review completed by our Client Solutions identified areas where the use of eCMS could support their ongoing improvement initiatives with the application of technology. Services, such as our functional reviews, bring added value to our customers and serve as the basis for many of our partnerships.”

### **About Computer Guidance Corporation**

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance’s eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering News-Record (ENR). Computer Guidance is a strategic technology partner with IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
