

OxBlue And Computer Guidance Collaborate On Integrated Product Offering
Comprehensive Dashboard Provides Live View of Projects Alongside Financial Summary

Scottsdale, Arizona – August 6, 2013 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, and OxBlue, a leader in the construction camera industry, today announced the completion of efforts to integrate OxBlue’s construction camera technology with Computer Guidance’s comprehensive business operations dashboard.

Computer Guidance’s operations dashboard provides project managers, job-site superintendents and other project stakeholders with an at-a-glance view of the financial performance for their individual projects. With the integration of OxBlue’s construction cameras, the operations dashboard becomes a comprehensive solution for the management of a project by either on-site or remote personnel with both current and historical views of job-site progress and financial data.

“Our construction cameras and automated time-lapse video technology have been changing the way that contractors manage their projects for over 12 years, helping contractors to reduce costs and increase efficiencies,” stated Chandler McCormack, President, OxBlue Corp. “Integrating with products such as Computer Guidance’s eCMS operations dashboard provides contractors with a single source for information, making it more convenient for them to find what they need and improving their ability to manage their projects.”

“We are excited about the integrated dashboard offering that we are able to provide through our partnership with OxBlue and see the value that it will bring to our mutual customers,” stated Michael Bihlmeier, President, Computer Guidance Corporation. “Our on-going strategy of integrating with third-party solution providers allows us to bring a more comprehensive solution to market encouraging our customers to go to a single source for all of their business intelligence needs.”

About Computer Guidance Corporation

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance’s eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering News-Record (ENR). Computer Guidance is a strategic technology partner with IBM Corporation, providing a solid technology foundation for both its hosted and enterprise solutions.
