

Computer Guidance Corporation Forms Software Delivery Department

The new department formalizes the company's go-to-market strategy and streamlines software delivery

Scottsdale, Arizona – October 1, 2013 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today announced the formation of their Software Delivery Department with the goal of streamlining software delivery processes and decreasing time to market for new releases.

The Software Delivery Department will unite those disciplines involved in the testing, packaging and implementation of new releases, allowing software to be delivered more quickly to customers and providing a more consistent experience for customer installations. The new department will assume control of the product as it exits development and be responsible for product quality, documentation, delivery and installation.

“I am excited about the creation of the Software Delivery Department and what it means for Computer Guidance and our customers.” states Mike Bihlmeier, President, Computer Guidance Corporation. “This new department will allow us to create a seamless and end-to-end process for the delivery of our products and improve our customer experience with implementations of new releases.”

“I created Computer Guidance as a company that always strives for innovation and looks to adapt the most current practices in software development for the betterment of our customers” stated Roger D. Kirk, Chief Executive Officer, Computer Guidance Corporation. “The creation of the Software Delivery Department is the latest step that we are taking to improve our business practices and streamline our internal processes.”

About Computer Guidance Corporation

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance's eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010.
