

## **Lyle Klingler Promoted to Head Software Delivery Department**

*Klingler will assume responsibility for quality testing, release packaging and software implementations*

Scottsdale, Arizona – October 3, 2013 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today announced the promotion of Lyle Klingler to the position of Software Delivery Manager, reporting directly to the company's President.

The recently created Software Delivery Department brings together those disciplines involved in the testing, documentation, packaging and implementation of new releases, allowing software to be delivered sooner to customers and providing a more consistent experience for customer installations.

"I am excited about the opportunity to create this department from the ground up that will provide an improved product release experience for our customers." states Lyle Klingler, Software Delivery Manager, Computer Guidance Corporation. "As part of this initiative, we are implementing standard business practices that are common to the software development industry while employing best practices for software delivery which allows us to bring new products to market faster and with improved quality."

"The Software Delivery Department is a key part of our overall company strategy to renew our internal processes in order to advance the quality of our releases and improve customer experiences." states Michael Bihlmeier, President, Computer Guidance Corporation. "Lyle has demonstrated his commitment to Computer Guidance and his capabilities to successfully lead a multi-disciplinary team to create a better method for the delivery of our products to our customers. We look forward to seeing the results of this new department in the upcoming months."

### **About Computer Guidance Corporation**

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies.
