

Rentenbach Implements Computer Guidance's Flagship Construction ERP—eCMS v.4.0

ERP Platform Flexibility and Functionality Deliver Specific General Construction Business Process Needs

Scottsdale, Arizona – November 12, 2013 – Computer Guidance Corporation, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, recently completed the implementation of its flagship eCMS enterprise resource planning solution, eCMS v.4.0, for Rentenbach. The Engineering News-Record Top 400 general contractor deployed eCMS v.4.0 with custom functionality to automate and optimize its business processes supporting its diverse construction projects across multiple states.

“The ability to customize the selected construction management software to meet our unique business process needs was a requirement in our solution review process.” stated Norman Lindsey, Assistant Treasurer, Rentenbach. “We selected eCMS for its flexible and scalable technology platform allowing our organization to adapt quickly to the ever-changing business requirements and to bring forth new functionality for continuous process improvements and competitive advantage.”

eCMS v.4.0 construction enterprise resource planning solution (ERP) was designed with significant solution architecture changes and the introduction of new technology solutions such as Web Services using Service-oriented Architecture (SOA) bringing openness and flexibility to our customers as they build custom functionality and integrate with third-party solutions.

“ERP software is not just about how many applications you can implement in your enterprise, but having the right functionality for your specific business needs and adjusting your software as the business demands it.” stated Roger D. Kirk, Chief Executive Officer, Computer Guidance Corporation. “eCMS provides our customers with the flexibility which combines feature-rich software applications, a rock solid IT platform and innovative technology infrastructure to integrate with third-party solutions, customize current programs and deploy them to the users on demand and in a transparent manner.”

About Computer Guidance Corporation

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance's eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering News-Record (ENR). Computer Guidance is a premier business partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise, enterprise solutions.
