

**Clark Builders Goes Live On Hosted eCMS Within Four Months Of Signing**  
*Leading Canadian General Contractor Takes Its Construction ERP To The Cloud*

Scottsdale, Arizona – November 18, 2013 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today announced that it has concluded the migration of Clark Builders from its legacy ERP solution to its flagship eCMS v.4.0 Construction ERP. Clark Builders went live on Computer Guidance's cloud-based, hosted eCMS solution just months after signing the ERP upgrade agreement.

Clark Builders, a subsidiary of Turner Construction, has selected eCMS v.4.0 construction ERP from Computer Guidance as the backbone of its multi-faceted business operations. The Edmonton-based general contractor provides commercial, industrial, institutional, recreational and residential construction services. Clark Builders is a five-year recipient of Best Employers in Canada and Canada's Best Managed Companies awards. The cloud-based, hosted ERP implementation included core financial management applications, job costing, time and material billing, Canadian payroll, human resources, purchasing, and project collaborator supported by business intelligence and analytics and enterprise content management productivity tools.

"Our strategic direction has been to move all business-critical applications to the cloud in order to minimize IT overhead and focus our company-wide efforts on executing our business objectives." stated Dean Doige, Chief Information Officer, Clark Builders. "We view Computer Guidance's eCMS v.4.0 solution as a central engine of our business with a solid, flexible and scalable cloud-based ERP infrastructure that is well-aligned with our overall corporate strategy."

"More and more construction companies are looking to professionally managed, cloud-based solutions for their business-critical systems, allowing them to focus on their core business while reducing the risk and costs associated with maintaining their own IT infrastructure." stated Mike Bihlmeier, President, Computer Guidance Corporation. "Our cloud-based ERP, Hosted eCMS, allows for a flexible deployment strategy with simple payment options that are suitable for any size and type of construction company. We are pleased with the response that our managed hosted services offerings have received in the market."

**About Computer Guidance Corporation**

Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies. Computer Guidance's eCMS solution provides financial accounting and project management applications supported by advanced business intelligence and innovative productivity tools. eCMS is recognized as the solution of choice for top general and specialty contractors in the CFMA Information Technology Survey and has been selected by the Associated General Contractors of America (AGC) as the construction management solution of choice for its members nationwide since 2010. Computer Guidance customers are recognized among the Top 400 Contractors and Top 50 Contractors by Engineering News-Record (ENR). Computer Guidance is a premier business partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise, enterprise solutions.
