Alberici Group Implements eCMS v.4.0 Construction Enterprise Resource Planning Solution

Computer Guidance ERP To Standardize Financial and Operations Management, Implement Greater Controls and Drive Consolidation of Various Business Units

Scottsdale, Arizona – January 21, 2014 – Computer Guidance Corporation, the leading developer of construction financial and project management software solutions for architecture, engineering and construction companies, today announced that Alberici Group, with annual revenues approximately $2 billion and consistently ranked in the top 60 construction companies in the United States by the Engineering News-Record, successfully concluded the implementation of Computer Guidance Corporation's ERP. eCMS v.4.0, Computer Guidance's flagship construction ERP now serves as the backbone of Alberici Group's North American operations' financial management and reporting infrastructure.

According to Greg Hesser, President and Chief Financial Officer at Alberici Group, "The rock-solid dependability and scalability of the Computer Guidance's ERP are critical to our organization which has doubled its size due to our recent acquisitions and the execution of our strategic growth plans. eCMS is capable of handling the volume of transactions that our multi-million dollar projects require while delivering construction-specific functionality for the day-to-day management of our general and industrial construction business. Our decision to partner with Computer Guidance for our technology solution needs was undoubtedly the right one."

eCMS now manages the entire lifecycle of the Alberici Group's construction projects by integrating all underlying financial and operational business processes and data, including accounting, financial reporting, human resources, payroll, time and material billing, material requisition, equipment maintenance and accounting, purchasing, subcontract management and more. The eCMS applications are supported with various productivity tools, including consolidated financial reporting, business analytics, and enterprise content management.

"The eCMS implementation was seamless for our organization due to Computer Guidance's expertise in enterprise-class solution implementations and our collaborative partnership. Our organization cut over its ERP system to the new platform and was entirely operational within four full days without any noteworthy issues. That is an accomplishment we proudly stand behind." said Frank Kropiunik, Chief Information Officer and Vice President of Support Services, Alberici Group. "With a trusted partner such as Computer Guidance and their proven solution, we are positioned well to continue to deliver on our business objectives for today and in the future."

"We are excited to partner with the Alberici Group in every step of the way as it continues to expand its business operations in North America." stated Roger D. Kirk, Chief Executive Officer, Computer Guidance Corporation. "The Alberici Group's ERP solution implementation and their daily reliance on our construction ERP are indicative of the commitment that we bring to our customers and the construction industry."

About Computer Guidance Corporation
Since 1981, Computer Guidance offers the most complete, proven and reliable construction management solution for architecture, engineering and commercial construction companies.
