The Krill Company, Inc. Selects Computer Guidance's Construction ERP
Integrated Financial and Project Management Solution to Support General Construction Business

Scottsdale, Arizona – March 18, 2014 – Computer Guidance Corporation - part of the Explorer Software Group of companies, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced that The Krill Company, Inc. has selected eCMS v.4.0 construction enterprise resource planning solution for the financial and project management of its construction, general contracting and design-build operations.

"We have chosen eCMS v.4.0 because it has integrated financial and project management tools and advanced business intelligence functionality that fit with our already established processes and provide the ability to add applications as our business continues to grow." stated Cindy Alspach, Accounting Manager, The Krill Company, Inc.

"Computer Guidance's eCMS v.4.0 ERP provides an effective and efficient way to manage both the back-office administration and field operations by delivering fully integrated applications with on-demand, web-based access and real-time business analytics." commented Mike Bihlmeier, President, Computer Guidance Corporation. "Further, eCMS v.4.0 was built with the needed flexibility and scalability that growing companies like The Krill Company demands."

The Krill Company has purchased Computer Guidance's core financial, Job Cost, Project Collaborator, Cognos Business Intelligence and Analytics and Enterprise Content Management applications. The general contractor is a privately owned contractor serving the state of Ohio.

About Computer Guidance Corporation

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier business partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became part of the Explorer Software Group of companies in January 2014. Explorer Software Group is a global software business that is exclusively in Construction with 25,000 users served, in 40 countries and in 6 continents, employing 250 staff. Explorer's core business philosophy is long-term commitment to customer service, coupled with providing the best possible solutions to customers.
