Borderland Construction Company, Inc. Selects Computer Guidance's Hosted eCMS
Integrated Construction Financial and Project Management Software To Manage Heavy and Civil Engineering Construction Business

Scottsdale, Arizona – April 8, 2014 – Computer Guidance Corporation - part of the Explorer Software Group of companies, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced that Borderland Construction Company has selected Computer Guidance's hosted, cloud-based eCMS construction enterprise resource planning solution for the management of its heavy and civil engineering construction business.

Borderland Construction Company is a general engineering contractor who performs site work for housing subdivisions, business facilities, public works projects, underground utilities, grading, paving, structural concrete and curb work in the Southern Arizona region.

Computer Guidance Corporation will deliver its core financial applications, job costing, human resources, equipment accounting, equipment maintenance and financial reporting applications to standardize business processes and improve productivity and efficiency.

"We selected to upgrade to Computer Guidance's latest eCMS ERP version based on our satisfaction with the solution since 1998 and due to its advanced and dynamic reporting functionality," stated CJ Prettyman, Chief Financial Officer, Borderland Construction Company. "Another determining factor in our selection process was the solution provider's well-known reputation of providing its ERP as a hosted, cloud-based solution."

"eCMS has proven to provide a reliable and scalable ERP for construction companies of any size," adds Computer Guidance's President, Michael Bihlmeier. "Our integrated applications deliver the required features and functionality to meet their business needs while providing the flexibility in solution deployment to respond to their IT strategy."

About Computer Guidance Corporation

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier business partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became part of the Explorer Software Group of companies in January 2014. Explorer Software Group is a global software business that is exclusively in Construction with 25,000 users served, in 40 countries and in 6 continents, employing 250 staff. Explorer's core business philosophy is long-term commitment to customer service, coupled with providing the best possible solutions to customers.
