

George & Lynch Implements Computer Guidance Construction ERP Solution

Feature-rich and Proven ERP Solution For Diverse General and Heavy Construction Business Needs

Scottsdale, Arizona – April 15, 2014 – Computer Guidance Corporation - part of the Explorer Software Group of companies, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced that George & Lynch, one of the largest, most diverse infrastructure contractors serving the Mid-Atlantic region of the United States, has implemented Computer Guidance's construction enterprise resource planning (ERP) solution. Computer Guidance's eCMS ERP solution is providing George & Lynch with the tools to be more competitive in the marketplace while increasing productivity and reducing operational expenses through integrated financial and project management applications.

With the eCMS ERP implementation, George & Lynch is leveraging the core financial management, job costing, order processing, purchasing, human resources, payroll, bill of materials, time and material billing, equipment accounting and maintenance, project collaborator and plant sales applications for their \$100M general and heavy construction business.

Barry Hudson, Chief Financial Officer, George & Lynch said "We employ over 360 construction professionals specializing in a wide variety of heavy, infrastructure related construction services of which we self-perform 80% or more. It is vital to our success to have integrated technology solutions in place that allow us to manage our daily operations with real-time cost controls, on-demand performance monitoring and accurate forecasting."

"The feature-rich application set, web-based access and our integrated business intelligence and analytics applications are just some of the areas where our ERP excels over the competition. This is why growing commercial contractors with diverse business requirements choose Computer Guidance's eCMS construction ERP over and over." stated Mike Bihlmeier, President, Computer Guidance Corporation.

About Computer Guidance Corporation

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier business partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became part of the Explorer Software Group of companies in January 2014. Explorer Software Group is a global software business that is exclusively in Construction with 25,000 users served, in 40 countries and in 6 continents, employing 250 staff. Explorer's core business philosophy is long-term commitment to customer service, coupled with providing the best possible solutions to customers.
