

**RD Olson Construction Goes Live on eCMS v.4.0 Construction ERP**  
*Hosted, Cloud-based ERP Implementation Within Budget and On Time*

Scottsdale, Arizona – May 6, 2014 – Computer Guidance Corporation - part of the Explorer Software Group of companies, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced that RD Olson Construction has successfully completed the implementation of Computer Guidance Hosted eCMS ERP solution.

With the implementation of Computer Guidance's Hosted eCMS ERP solution, RD Olson Construction upgraded a number of its financial management applications, including core accounting, payroll, human resources and introduced to their organization Cognos Business Intelligence and Analytics and the latest Enterprise Content Management applications suite in support of their ongoing operational efficiency initiatives.

"We were confident that the Computer Guidance team would help us overcome any of our challenges if/as they arise throughout the implementation project." commented Bruce Weir, CCIFP, Controller, RD Olson Construction. "Now that we have concluded our implementation project, I am pleased to state that it was a successful one that was done within budget and on time. The Computer Guidance team was very attentive in responding to our needs throughout the implementation project."

"We are pleased at the rate we bring customers live on eCMS v.4.0 regardless of the deployment option—on-premise or cloud-based—they select, while customer feedback about our implementation projects has also been nothing but positive." stated Penny Muzzy, Manager of Professional Services, Computer Guidance Corporation. "The successes of our go-live implementations including RD Olson, are accredited to our well-defined processes and the collaborative approach we take with our customers."

**About Computer Guidance Corporation**

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier business partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became part of the Explorer Software Group of companies in January 2014. Explorer Software Group is a global software business that is exclusively in Construction with 25,000 users served, in 40 countries and in 6 continents, employing 250 staff. Explorer's core business philosophy is long-term commitment to customer service, coupled with providing the best possible solutions to customers.
