

Ground Water Treatment & Technology Signs With Computer Guidance Corporation

Cloud, Hosted eCMS Construction ERP to Manage GWTT's Operating Divisions and Locations

Scottsdale, Arizona – May 13, 2014 – Computer Guidance Corporation - part of the Explorer Software Group of companies, the leading developer of financial and project management software solutions for architecture, engineering and construction companies, today announced that Ground Water Treatment & Technology has signed a multi-year agreement with Computer Guidance Corporation for its cloud, hosted construction ERP solution.

Founded in 1996, Ground Water Treatment & Technology has been providing environmental services for hundreds of customers throughout North America, including remediation equipment design, construction and refurbishment services, and operation, optimization and maintenance of groundwater treatment systems. With four separate operating divisions and five main office locations, GWTT will rely on Computer Guidance's Hosted eCMS for their construction accounting and financial management needs.

"Our selection of Computer Guidance's eCMS ERP is part of a wider commitment to improve operational efficiency and productivity within our organization, so it was important to choose an enterprise-class software package that provides unlimited accessibility to data and unrestricted flexibility to business process improvements." stated Bryan Lamphear, Controller of Ground Water Treatment & Technology. "With that, our implementation will greatly focus on job cost accounting and project financials leveraging business intelligence and analytics, and a wide variety of other productivity tools."

"Providing mission-critical data to those who need it, when and where they need it is the core of what we do. Our browser-based, integrated construction ERP has proven to help commercial contractors drive productivity, efficiency and profits by making available business-critical data on an ongoing and continuous basis." stated Mike Bihlmeier, President, Computer Guidance Corporation. "Our Hosted eCMS ERP will undoubtedly be a great fit for GWTT, a commercial contractor with diverse operations performing as multiple operating divisions at several individual locations."

About Computer Guidance Corporation

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier business partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became part of the Explorer Software Group of companies in January 2014. Explorer Software Group is a global software business that is exclusively in Construction with 25,000 users served, in 40 countries and in 6 continents, employing 250 staff. Explorer's core business philosophy is long-term commitment to customer service, coupled with providing the best possible solutions to customers.
