

Poettker Construction Goes Live on eCMS v.4.0 Construction ERP

Construction ERP Delivers Financial And Project Management Data For General Contracting Business

Scottsdale, Arizona – June 17, 2014 – Computer Guidance Corporation, the leading developer of ERP software solutions for the construction industry, today announced that Poettker Construction, a Computer Guidance customer since 1988, has implemented eCMS v.4.0 ERP software for its Construction Management, General Contracting, Design/Build business.

With the implementation of Computer Guidance's eCMS v.4.0, Poettker Construction rolled out a number of applications, including core accounting, time and material billing, payroll, human resources, job costing, equipment accounting, purchasing, order processing, business intelligence, enterprise content management and eCMS Connect for Prolog.

"With eCMS v.4.0, we effectively and efficiently established company-wide, standardized business processes supported by a unified solution platform with integrated workflows and centralized data reporting. The improved processes and the ability to access and disseminate information real time across the organization have significantly changed the way we manage our daily business operations taking our company to the next level in performance and competitiveness." stated Charles Poettker, President, Poettker Construction.

"We are intensely focused on ensuring our clients have access to the data and technologies to improve decision making and to maximize their growth." commented Mike Bihlmeier, President, Computer Guidance Corporation. "Our holistic approach to data acquisition, management and distribution will better align Poettker's company resources and lead to considerable improvements in operational productivity and financial performance."

About Computer Guidance Corporation

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier business partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation is part of the Explorer Software Group of companies. Explorer Software Group is a global software business that is exclusively in Construction with 25,000 users served, in 40 countries and in 6 continents, employing 250 staff.
