Quest Ventures Southwest, Inc. Selects Computer Guidance's Cloud-based, Hosted eCMS Construction ERP Software For Its Heavy/Civil Construction Needs
Computer Guidance Corporation Welcomes New Customer

Scottsdale, Arizona – July 9, 2014 – Computer Guidance Corporation, a leading developer of ERP software solutions for the construction industry, today announced that Quest Ventures Southwest, Inc. has selected Computer Guidance's cloud-based, Hosted eCMS construction ERP to more effectively manage its heavy/civil construction projects throughout the entire western United States, Alaska and Hawaii.

Quest Ventures Southwest, Inc was looking for a single ERP system for the management of its job costs, payroll, core accounting functions while bridging the gap between its corporate financial reporting and field operations. Seeking an enterprise-class and integrated ERP solution to manage all business-critical data throughout its growing business was a priority for the heavy/civil contractor.

"We chose Computer Guidance's Hosted eCMS due to its proven reliability, scalability and advanced construction-specific functionality." Layne Birling, Chief Financial Officer, Quest Ventures Southwest, Inc. "Computer Guidance's long-term reputation as a leader in providing enterprise-class and feature-rich financial and project management applications for the construction industry, as well as my long-standing relationship with Computer Guidance also guided our decision."

"We are pleased to partner with Quest Ventures Southwest bringing to their organization greater efficiencies with the reduction of duplicated efforts and manual processes", stated Steve Gross, Director of Client Solutions, Computer Guidance Corporation. "With our Hosted eCMS software, we are confident that Quest Ventures Southwest will realize significant savings and added benefits as they rightly align their organizational objectives and current business processes."

About Computer Guidance Corporation

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier Business Partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became part of the Explorer Software Group of companies in January 2014. Explorer Software Group is a global software business that is exclusively in Construction with 40,000 users served, in 40 countries and in 6 continents, employing 250 staff. Explorer's core business philosophy is long-term commitment to customer service, coupled with providing the best possible solutions to customers.
