

**Price Gregory International Implements Computer Guidance's Construction ERP Platform  
eCMS To Support Leading Energy Infrastructure Services Provider's Expansion In The Gas, Oil and Pipeline  
Construction Market**

Scottsdale, Arizona – August 12, 2014 – Computer Guidance Corporation, a leading developer of ERP software solutions for the construction industry, today announced that Price Gregory International, a leading energy infrastructure services provider with rich history in the construction of gas, oil, and products pipelines, has completed their implementation of Computer Guidance's eCMS v.4.0 Construction ERP solution.

eCMS v.4.0 Construction Platform will serve as the backbone of the specialty contractors' multi-faceted business managing its core accounting, payroll, human capital management, job costing, financial reporting and project management business processes across multiple geographical locations. Main focuses of the ERP implementation were to gain added visibility and greater control over operating and financial performance for its divisions and ongoing jobs.

"For our rapidly growing and ever-changing business, an enterprise-class ERP system is vital to our continued success. eCMS allows us to standardize our business processes and improve our performance by leveraging integrated and intuitive business intelligence and data mining solutions," stated Irene Schaffer, Chief Financial Officer, Price Gregory International.

"Computer Guidance's eCMS Construction Platform is widely known for its rock solid technology platform and leading construction-specific financial applications in the industry. Building on this foundation, we are bringing to our customers a construction platform that provides them the business intelligence and knowledge they need to analyze, manage and forecast their performance," added Mike Bihlmeier, President, Computer Guidance Corporation. "Innovative technologies such as cloud deployment, browser-based ERP, mobile apps, big data and business intelligence & analytics solutions support our eCMS Construction Platform further solidifying our ERP leadership position for mid-to-large contractors in North America."

**About Computer Guidance Corporation**

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier Business Partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became part of the Explorer Software Group of companies in January 2014. Explorer Software Group is a global software business that is exclusively in Construction with 40,000 users served, in 40 countries and in 6 continents, employing 250 staff. Explorer's core business philosophy is long-term commitment to customer service, coupled with providing the best possible solutions to customers.
