

James Hamilton Construction Selects eCMS Construction ERP Platform
Technology Innovation and ERP Functionality Drive Decision

Scottsdale, Arizona – August 19, 2014– Computer Guidance Corporation, a leading developer of ERP software solutions for the construction industry, today announced that James Hamilton Construction, leading heavy highway and industrial contractor headquartered in Silver City, New Mexico, has signed an agreement for the implementation of Computer Guidance’s Hosted eCMS Construction ERP platform.

James Hamilton has selected eCMS v.4.0 over competitive products in the market due to the feature-rich construction management applications and the enterprise-wide platform allowing the integration of information across the entire organization. James Hamilton will be implementing Computer Guidance’s Cloud-based, Hosted eCMS ERP with core financial applications, project management, business intelligence, and enterprise content management applications.

“With the comprehensive business intelligence capabilities of eCMS, we will be able to leverage data received from across the organization in support of decision-making and consolidated financial reporting,” said Jossanne Neil, Accounting Manager, James Hamilton Construction. “We are confident that eCMS will bring increases in productivity through simplified business processes and real-time data capture.”

“One of our goals when searching for a new solution was to consolidate all of our data and processes onto a single, fully integrated platform.” said Linda Fuller, IT Implementation Manager, James Hamilton Construction “With the move to Hosted eCMS, we will be able to simplify the management of our IT infrastructure.”

“For the past thirty three years, Computer Guidance has been providing commercial contractors with the tools needed to support their businesses,” said Mike Bihlmeier, President, Computer Guidance Corporation. “James Hamilton’s selection of eCMS validates that we are achieving these objectives while we continue to strive on bringing ongoing technology innovation and advancements to our customers.”

About Computer Guidance Corporation

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier Business Partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance’s construction software expertise has led the Associated General Contractors of America to select Computer Guidance’s solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor’s Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became part of the Explorer Software Group of companies in January 2014. Explorer Software Group is a global software business that is exclusively in Construction with 40,000 users served, in 40 countries and in 6 continents, employing 250 staff. Explorer’s core business philosophy is long-term commitment to customer service, coupled with providing the best possible solutions to customers.
