

International Cooling Tower, Inc. Goes Live On eCMS v.4.0 Construction ERP

Integrated Financial and Project Management Applications Bring Improved Productivity and Efficiency

Scottsdale, Arizona – August 26, 2014 – Computer Guidance Corporation, a leading developer of ERP software solutions for the construction industry, today announced that International Cooling Tower has completed the implementation of Computer Guidance's eCMS v.4.0 Construction ERP software, bringing additional productivity and efficiency tools to its financial administration and jobsite operations.

International Cooling Tower is a major North American manufacturer and service provider of industrial cooling towers. The organization offers technologically advanced products and services that are specifically designed for a diverse range of applications, including power generation, petrochemical, central utilities, pulp & paper, mining, refineries and others. With multiple locations in the United States and Canada, International Cooling Towers utilizes eCMS v.4.0 Construction ERP to manage its accounting, financial reporting, payroll, human resources, equipment, job cost and project management business processes. The on-site ERP deployment also includes Computer Guidance's Enterprise Content Management and Cognos Business Intelligence & Analytics solutions.

According to Harvey Saskiw, Chief Financial Officer at International Cooling Tower, Inc.: "With the implementation of eCMS v.4.0 construction platform from Computer Guidance, we were able to merge all of our data and processes for our US and Canadian operations, bringing immediate productivity gains and added efficiencies to our business. Building on standardized processes and unified data, we are introducing reports and dashboards with Cognos Business Intelligence & Analytics as well as implementing advanced imaging, workflows, document management and archiving for our users."

"The pace at which information is collected and shared in the world today requires technologies such as browser-based applications, cloud technologies, mobile applications, integrated content management solutions and a single database driven platform," stated Mike Bihlmeier, President, Computer Guidance Corporation. "Our rock solid construction ERP platform provides our customers the leverage to seize more opportunities and market share."

About Computer Guidance Corporation

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier Business Partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became part of the Explorer Software Group of companies in January 2014. Explorer Software Group is a global software business that is exclusively in Construction with 40,000 users served, in 40 countries and in 6 continents, employing 250 staff. Explorer's core business philosophy is long-term commitment to customer service, coupled with providing the best possible solutions to customers.
