J. F. Brennan Company, Inc. Implements Computer Guidance Construction ERP Platform
eCMS v.4.0 Construction ERP Platform To Further Optimize Business Operations and Profitability

Scottsdale, Arizona – September 16, 2014 – Computer Guidance Corporation, the leading developer of ERP software solutions for the construction industry, today announced that J. F. Brennan Company, Inc. has successfully implemented Computer Guidance's eCMS v.4.0 Construction ERP software to further optimize and streamline its multidimensional specialty construction operations.

J. F. Brennan Company, Inc., a marine construction and environmental remediation company that provides high-quality services to engineering, utility, railroad, paper mill, government, municipality, and harbor entities located throughout the inland waterways of the United States, has to tightly manage its labor and equipment costs to ensure they obtain the desired profit margins on each job. J. F. Brennan Company, Inc. looked to upgrade to Computer Guidance's flagship ERP platform, eCMS v.4.0, to take advantage of the advanced business intelligence and analytics functionality and innovative third-party integration capabilities it offers.

J. F. Brennan Company, Inc.'s Financial Systems Analyst, Tori Weissenberger commented on the importance of having a comprehensive ERP solution that not only manages the core accounting functions but also delivers concise and timely reports allowing key stakeholders real-time visibility into job costs and profit margins. "It is important that our construction ERP software is able to provide data when and where our users need it so we can optimize our profitability on each job," said Weissenberger. "With eCMS v.4.0 we have the ability to leverage dashboards, reports and workflows with on-demand access to business-critical data. Furthermore, we wanted to implement eCMS Connect for Comdata, electronic payment solution, to increase financial controls, automate internal processes and reduce administrative costs."

"Maximizing the value of your ERP data is the single most critical thing you can do to drive improved performance and profit margins," commented Ken Kopal, Director of Software Development, Computer Guidance Corporation. "Our product development efforts have been significantly focused on delivering the flexibility and accessibility of business-critical data, whether integrated or organic, so our customers make faster and smarter decisions on a daily basis as well as better plan for their future."

About Computer Guidance Corporation
Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier business partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation is part of the Explorer Software Group of companies. Explorer Software Group is a global software business that is exclusively in Construction with 25,000 users served, in 40 countries and in 6 continents, employing 250 staff.
