

Park Construction Company Implements Computer Guidance Hosted ERP Software
Cloud-based Construction ERP Provides Process Improvements and New Capabilities

Scottsdale, Arizona – November 18, 2014 – Computer Guidance Corporation, the leading developer of ERP software solutions for the construction industry, today announced that Park Construction Company has successfully implemented Computer Guidance's hosted, cloud-based eCMS Construction ERP software for the management of its leading and well-recognized general construction business.

With the ERP go-live, the Minnesota-based general contractor will utilize Computer Guidance's core financial applications, equipment accounting, equipment maintenance, human resources, payroll, job costing, Cognos Business Intelligence and Analytics applications, and a number of productivity tools to manage its projects for commercial, municipal, industrial, railroad and federal agencies. In addition to the features and functionality that eCMS applications will bring to Park Construction, the commercial contractor will leverage the integration established between eCMS ERP and HCSS HeavyBid, Dispatcher and HeavyJob applications for job estimating, field and resource management.

"We are excited about the implementation of Computer Guidance's Cloud-based eCMS v.4.0 ERP software as we pride ourselves on providing our customers with the highest levels of safety, quality and accuracy in project schedules," stated John Hedquist, Vice President/CFO/Secretary, Park Construction Company. "Hosted eCMS and its integration with HCSS applications will strengthen our ability to deliver our projects on time and on budget."

"Our job is to help clients streamline their daily business processes by delivering them real-time data and automated workflows," commented Andrew Grasso, Account Manager of Computer Guidance Corporation. "This involves more than getting clients live on our software. We work with our customers to find out how we can continuously improve their operations. We rely on their feedback to determine the direction for our product development efforts and next generation of our offerings. It's truly a collaborative process."

About Computer Guidance Corporation

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier Business Partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became a member of JDM Technology Group in January 2014. JDM Technology Group is a global software business that is exclusively in Construction with 40,000 users served, in 40 countries and in 6 continents, employing 250 staff. JDM Technology Group's core business philosophy is long-term commitment to customer service, coupled with providing the best possible solutions to customers.
