**Computer Guidance and Comdata Launch Streamlined, Automated Payment Process**  
*Integrated Vendor Payment and Expense Management Solution Benefits Mutual Clients*

Scottsdale, Arizona – March 3, 2015 – Computer Guidance Corporation, the leading developer of ERP software solutions for the construction industry, today announced that it has partnered with Comdata, leading electronic payment provider, to offer customers integrated solutions that automate vendor payment and expense management processes.

As a result of this collaboration, Comdata Virtual Payment MasterCard seamlessly integrates with Computer Guidance's eCMS Construction Enterprise Resource Planning (ERP) solution to eliminate the challenges associated with traditional expense management, expense reimbursement, vendor payment and bank reconciliation.

eCMS Connect for Comdata Virtual Payment MasterCard links eCMS Accounts Payable and Accounts Receivable applications with Comdata solutions for end-to-end automation of vendor payment processing and bank reconciliation of these payment transactions. In addition, eCMS Connect and Comdata support the automation of expense transaction tracking, payments and reimbursements.

"Computer Guidance customers now have a more efficient way to pay their employees, vendors and suppliers," stated Eric Newton, Senior Vice President of Construction at Comdata. "By integrating Comdata's Virtual Payment MasterCard with eCMS Connect, our mutual clients can pay their employees and vendors on time without the complications of setting up bank accounts or delivering payroll checks to their employees on job sites."

According to Mike Bihlmeier, President of Computer Guidance Corporation, "Commercial contractors in today's business environment demand continuous process improvements to heighten productivity, reduce unnecessary expenses, and drive every competitive advantage possible to strengthen their profitability. Leading contractors want added functionality through integrated solutions to avoid endless manual processes and labor-intensive tasks, and eCMS Connect for Comdata delivers a simple yet sophisticated solution that can overcome these obstacles and add profit back to the bottom line."

**About Computer Guidance Corporation**

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier Business Partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became a member of JDM Technology Group in January 2014. JDM Technology Group is a global software business that is exclusively in Construction with 45,000 users served, in 40 countries and in 6 continents, employing 300 staff.
