Winter Construction Selects Computer Guidance's eCMS v.4.0 Construction ERP Solution

ENR Top 400 General Contractor Chooses Computer Guidance to Support Its Growing Full Range Commercial Construction Services Business throughout the Southeastern and Mid-Atlantic regions

Scottsdale, Arizona – March 24, 2015 – Computer Guidance Corporation, the leading developer of ERP software solutions for the construction industry, today announced that Winter Construction has selected Computer Guidance's flagship construction ERP solution. With eCMS v.4.0, Winter Construction will take advantage of the state-of-the-art technology platform supporting the industry's leading business intelligence and on-demand accessibility to integrated financial and project data.

Winter Construction, headquartered in Atlanta, Georgia, is a privately held, multi-disciplinary general contracting company offering construction and environmental services throughout the United States. Winter is consistently ranked as an ENR Top 400 company and is ranked as one of Atlanta Business Chronicle's Best Places To Work. For more information visit: http://www.wintercompanies.com
.
A customer since 1988, Winter Construction will be utilizing new productivity tools such as integrated financial and project management functionality, real-time information sharing, employee self-service, advanced security options and interactive, and the customizable user interface of eCMS v.4.0.

"Computer Guidance's eCMS ERP has served as the backbone of our construction business for many years managing our business-critical data and processes," stated Ralph Mumme, EVP and CFO of Winter Construction. "Upgrading to Computer Guidance's latest ERP solution will allow our organization to continue to leverage the system's powerful cost accounting and financial functionality and to introduce some new innovative technologies and features that will save us time and reduce additional expenses."

"eCMS v.4.0 has been a great success for our clients, delivering tremendous productivity gains and cost-savings," commented Mike Bihlmeier, President of Computer Guidance Corporation. "Our browser-based ERP supported by the industry's most advanced business intelligence application suite and many easy-to-use feature-rich applications enables our customers to address their changing businesses in a more timely fashion. Our application toolset continues to grow bringing to market many new ways to help our clients keep pace and remain ranked among the industry's best."

About Computer Guidance Corporation

Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier Business Partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.

Computer Guidance Corporation became a member of JDM Technology Group in January 2014. JDM Technology Group is a global software business that is exclusively in Construction with 45,000 users served, in 40 countries and in 6 continents, employing 300 staff.
