WIMCO Corporation Goes Live With Computer Guidance Cloud-based Construction ERP Software
One of North Caroline's 2015 Best Employers Successfully Implements Cloud-based Construction ERP Software to Manage Its Growing General Contracting Business

Scottsdale, Arizona – April 28, 2015 – Computer Guidance Corporation, the leading developer of ERP software solutions for the construction industry, today announced the successful go-live of its end-to-end construction ERP software—eCMS v.4.0 at its long-term customer, WIMCO Corp.

WIMCO Corp manages approximately 150 construction projects a year in the hospitality, education, retail, public service and private sector with over 50 full-time supervisory and management employees. With Hosted eCMS, WIMCO takes advantage of Computer Guidance's cloud offering leveraging cost accounting, core financials, human resources, payroll, purchasing, enterprise content management, business intelligence and Project Collaborator applications to further automate its business processes and increase organization-wide efficiencies while realizing the additional benefits of a cloud-based ERP deployment.

Darlene Moore, Executive Vice President of WIMCO Corp said, "Computer Guidance has always been the leader in delivering innovative ERP solutions to the construction industry but now with the powerful eCMS v.4.0 functionality, the transparency between the field and the office is unprecedented through the ubiquitous accessibility and instantaneous availability of real-time, accurate and integrated data leveraging various cutting-edge technologies and applications."

"We are fortunate to experience steady growth in the past couple of years. We believe that this is direct result of our successful execution of our corporate strategy that focuses on our continued commitment to our customers, employees and business partners. Computer Guidance has been an integral part of this ecosystem since 1998 and we continue to build on this partnership," stated Kevin Rawls, President of WIMCO Corp. "Our recent decision to upgrade to eCMS v.4.0 and to move our most critical business processes and data to the cloud was simply based on the rock-solid system reliability of eCMS and our firm partnership with CGC."

Commenting on the go-live, Mike Bihlmeier, President of Computer Guidance Corporation said, "We have witnessed tremendous growth and success of our clients and our eCMS v.4.0 ERP solution provides the tools to help them continue that trajectory. We are very excited about what the future holds for WIMCO as they are a great testament to our shared commitment for embracing and leveraging leading technologies."

About Computer Guidance Corporation
Computer Guidance is the software development expert for construction enterprise resource planning solutions. In business since 1981, Computer Guidance has provided its customers with construction financial and project management applications supported by industry-leading business intelligence and analytics applications and advanced productivity tools. Computer Guidance is a premier Business Partner of IBM Corporation, providing a solid technology foundation for both its cloud-based, hosted and on-premise solutions. Hundreds of commercial contractors have implemented Computer Guidance ERP achieving quantifiable benefits year after year. Many Computer Guidance customers are represented among the Engineering News-Record Top 50, 400 and 600 and the On-Site Top 40. Computer Guidance's construction software expertise has led the Associated General Contractors of America to select Computer Guidance's solutions as the ERP solution of choice for its members. eCMS has also been acknowledged by the CFMA IT Survey, ranking its job cost, accounting and payroll applications as the number one software for commercial contractors. In 2013, Computer Guidance received a silver Contractor's Choice award from Roads & Bridges magazine recognizing eCMS as one of the most widely implemented ERP solutions among its readership.
