Clark Builders Wins *Constructech* Vision Award for Innovative Technology Application of Computer Guidance Cloud-based ERP Applications

Commercial General Contractor Recognized for Integrated Financial Management and Advanced Business Intelligence & Analytics In Support of Its Continued Growth and Expansion

Scottsdale, Arizona – September 1, 2016 – Computer Guidance Corporation, the leading developer of cloud-based ERP solutions for the construction industry, today announced that Clark Builders was named a 2016 Vision Award winner in the *Builder/GC Commercial More than \$500 million Category* by *Constructech* magazine for leveraging innovative technologies enabled by Computer Guidance Corporation’s eCMS ERP solution.

The *Constructech* Vision Awards acknowledge companies for their innovative approach to solve a particular issue and leverage technology in ways to make them more competitive in the marketplace.

“It takes more than just having the latest technology to stay ahead of the game,” says Peggy Smedley, editorial director, *Constructech*. “This year’s Vision Award winners are demonstrating they are reinventing how solutions are used, and are capturing a competitive advantage that will set them apart for years to come.”

Clark Builders, a partner of the Turner Construction Company, providing commercial, light industrial, industrial and multi-family residential construction services across Northern and Western Canada from its locations in Edmonton, Yellowknife, Saskatoon and Calgary earned a Vision Award for streamlining and automating its payroll, human resources and financial accounting functions with the implementation of CGC’s eCMS applications. As a result, Clark Builders was able to reduce its costs and increase its capacity by empowering end users in every department of the firm. They saw immediate and notable productivity gains and enhanced efficiencies that have established a foundation for the firm’s continued growth.

“We are pleased to be recognized at the *Constructech* Vision Awards for our eCMS ERP implementation and utilization,” stated Dean Doige, CIO, Clark Builders. “Our team estimates 75% processing efficiency increase in payroll entry, auditing and management, 85% process improvements in employee onboarding, employee information capture and management, and company-wide payroll processing. We have also become 95% paperless of payroll processing and documentation. These are tremendous achievements with a labor force of over 1,000 full-time employees.”

“We were proud to be on site to witness Clark Builders receiving this prestigious award as an industry leader,” said Andrew Grasso, Account Manager, Computer Guidance Corporation. “We are honored to partner with our customers and play an important role in supporting their growth and enabling their operations.”

About Computer Guidance Corporation
