Reynolds Construction Goes Live On eCMS Cloud Construction ERP Software
Successful Implementation of Computer Guidance's Cloud ERP in Less Than 4 Months

Scottsdale, Arizona – June 27, 2017 – Computer Guidance Corporation, the leading developer of cloud-based ERP solutions for the construction industry, today announced that Reynolds Construction, LLC has gone live on Computer Guidance's Cloud Construction ERP solution in less than four months since initiation of the project.

Reynolds Construction is one of the nation's leading water and wastewater contractors, offering innovative project design and construction. Reynolds delivers sustainable solutions to government agencies, industrial and private clients by performing traditional Construction as well as Alternative Delivery services of critical water and wastewater treatment facilities and pipeline installation. Reynolds Construction selected Computer Guidance's eCMS ERP solution in February of 2017 with technology innovation and proven performance as well as speed of delivery as critical requirements to accommodate the company's future growth plans.

Commenting on the implementation, Liz Smith, Controller, Reynolds Construction said, "We wanted our ERP system to be in place shortly after signing, so we could benefit from the integrated view of business performance and efficient, transparent processes. We are pleased with the short time it took for the hosted system infrastructure enablement and the overall ERP implementation, including application training, business process consultation and more."

Reynolds Construction is live on Computer Guidance's Cloud eCMS ERP solution, which is hosted in a Tier III, Sarbanes-Oxley compliant, highly secure data center that provides 24/7 access to data with redundancy measures and top notch management and oversight in the form of partnership between IBM Corporation and Avnet.

"Our team, working in collaboration with Reynolds Construction, quickly identified critical business processes and industry specific needs important to Reynolds Construction and quickly began laying a solid groundwork plan for the implementation," stated Penny Muzzy, Manager of Professional Services, Computer Guidance Corporation. "The unwavering dedication and efforts by both teams resulted in a timely and successful go-live implementation plan, and we look forward to fully supporting them with their aggressive growth plans."

About Reynolds Construction, LLC

Reynolds Construction, LLC, (formerly known as Layne Heavy Civil, Inc.) a privately held company, is one of the industry's leaders in the construction of water and wastewater infrastructure. Reynolds operates in 7 integrated offices nationwide, with a current staffing of approximately 300 employees. Specializing in water supply and piping systems; sewer mains and wastewater conveyances; and treatment facilities, Reynolds offers these services under both traditional and alternative project delivery. With a legacy of nearly 75 years, Reynolds still holds true to the basic fundamental values by which it was founded, to deliver projects safely, on time, and within budget, providing efficient, well-functioning systems.
