Computer Guidance Corporation Releases eCMS v.4.1 Project Collaborator Application

A Feature-rich Project Planning, Collaboration and Management Solution integrated with all eCMS Applications—Financials, Content Management, Workflow, Business Intelligence and Analytics—as well as Email

Scottsdale, Arizona – April 18, 2017 – Computer Guidance Corporation, the leading developer of cloud-based ERP solutions for the construction industry, today announced the official release of its next generation, eCMS v.4.1 Project Collaborator application.

Project Collaborator helps contractors manage both the financial as well as the operations aspects of their construction projects regardless of the size, type or location. Project Collaborator delivers a powerful feature set addressing job costing, change order management, forecasting, subcontracts and contracts, owner billing, cost management and financial reporting on the financial side, and submittals, emails, content management, punch lists, meeting meetings, alerts, workflows on the operations and communication side. Since the application is integrated with all eCMS applications, it provides project stakeholders with on-demand access to business-critical information and integrated company-wide processes.

Project Collaborator features include:

- supports all types of content including BIM, CAD, email, Microsoft Office, images and video files
- ubiquitous access to the browser-based application that can be deployed in the cloud or on premise
- mobile device and web browser independent application
- interactive project dashboard with detailed drill-down capabilities and flexible reporting
- integrated financial and project management workflows

“eCMS v.4.1 Project Collaborator allows our customers to shorten their billing cycles, reduce their financial reporting timeframe, increase their operational efficiencies and transform their operations by providing real-time visibility to project and labor costs, project status, outstanding change orders and approvals, and so much more,” said Steven Gross, VP of Client Solutions, Computer Guidance Corporation. “With the next generation of PC, we are providing our clients with unprecedented collaboration capability and financial controls helping them achieve better margins on each job.”

About Computer Guidance Corporation

With over 20% of their client-base represented on top ENR lists, Computer Guidance Corporation has long delivered the leading construction-specific enterprise resource planning solution including financial and project management applications, #1 business intelligence, mobile technologies and enterprise content management. Scalable, custom configurable and available both cloud hosted and on-premise, eCMS serves the needs of thousands throughout North America and has been named as the ERP solution of choice by the AGC. Computer Guidance Corporation is part of JDM Technology Group, a global construction-specific software conglomerate that serves more than 100,000+ users in 40 countries and 6 continents.
