### **Tri-City Electrical Contractors Implements Mobile eCMS Software For Improved Field Operations**

*Computer Guidance Corporation's Mobile eCMS Application Delivers Significant Productivity Gains and Efficiencies*

Scottsdale, Arizona – September 26, 2017 – Computer Guidance Corporation, the leading developer of ERP software solutions for the construction industry, today announced Tri-City Electrical Contractors has implemented Mobile eCMS for the collection, management and distribution of field payroll.

Mobile eCMS provides users with the ability to enter timesheets and approvals anytime, anywhere. With Mobile eCMS, users stay connected, even while on the road or at various remote job sites. Information entered is directly delivered into eCMS applications for further processing and reporting.

“Access to real-time labor information has revolutionized our office operations,” stated Kim Richmond, M.I.S. Director, Tri-City Electrical Contractors.

Tri-City Electrical Contractors have gained significant efficiencies by eliminating manual processes involved in labor time collection, management and processing. In addition, the organization now has the ability to view and analyze real-time and payroll information on demand.

“Mobile eCMS has driven new efficiency into what were once very labor-intensive processes that bogged down our field operations,” said Kim Richmond, M.I.S. Director, Tri-City Electrical Contractors. “The app allows supervisors and on-site workers to focus all of their efforts on priority number one... our customers’ projects.”

“The expense and time consumed by manual processes like those once in place at Tri-City Electrical are common across the construction industry, so we were ready and willing to provide a solution that would change their approach and, therefore, the outcome,” said Steve Gross, VP of Client Solutions, Computer Guidance Corporation. “Mobile eCMS helps our clients enhance efficiency through proactive decision-making, resource allocation, budget alignment and overall project execution.”

#### **About Computer Guidance Corporation**

With over 20% of their client-base represented on top ENR lists, Computer Guidance Corporation has long delivered the leading construction-specific enterprise resource planning solution including financial and project management applications, #1 business intelligence, mobile technologies and enterprise content management. Scalable, custom configurable and available both cloud hosted and on-premise, eCMS serves the needs of thousands throughout North America and has been named as the ERP solution of choice by the AGC. Computer Guidance Corporation is part of JDM Technology Group, a global construction-specific software conglomerate that serves more than 45,000 users in 40 countries and 6 continents.
