

## eCMS Cloud ERP

eCMS Cloud ERP Helps Commercial Contractors Manage Critical Business Information and Make Proactive, Data-Based Decisions

### PRODUCT HIGHLIGHTS

eCMS meets contractors' unique needs, regardless of size and complexity using:

- Construction-specific, feature-rich application suite
- Unparalleled business intelligence and analytics
- Reliability, scalability and flexibility
- Single platform for office and jobsites
- Web-based, cloud and mobile

**e**CMS Cloud ERP is enterprise-class construction management software, built to help commercial contractors effectively manage all aspects of their business through a single, powerful platform. Its intuitive design and advanced technology enable contractors to capture, access, manage, analyze and share data seamlessly, easily and securely. eCMS delivers fact-based and proactive decision-making capabilities leveraging cloud, mobile and web-based technologies so end-users can utilize data—anywhere, anytime and in any format from within a common structure.

eCMS customers can empower every user—field workers, office staff, executives, vendors and regulators—with secure and appropriate access to real-time content without having to migrate, convert or merge. Intuitive dashboards and reports allow users to compare historical performance, view current status and trends, as well as project critical future outcomes.
