CGC eCMS v.4.2 Construction Cloud ERP Software

eCMS v.4.2 Drives Commercial Contractor Growth With Digital Transformation, Seamless Automation and Powerful Data

REGARDLESS OF PROJECT SIZE, SCOPE OR COMPLEXITY, CGC eCMS v.4.2 MEETS CONTRACTORS' GOALS WITH:

- Digital Data and Workflow Transformation
- Construction-Specific, Feature-Rich Application Suite
- Unparalleled Business Intelligence
- Reliability, Scalability and Flexibility
- Single Platform for Office and Field
- Web-Based, Cloud and Mobile Access

> " *eCMS v.4.2 is a single, powerful platform that provides one version of the truth that every user can see, share and leverage in their daily decisions.*

F acing strong headwinds from a volatile global economy, commercial contractors are becoming increasingly reliant on advanced enterprise technologies in order to maintain or improve overall performance and ongoing profitability. Today's ever-changing business landscape demands a rock-solid ERP core as well as the flexibility to meet various customer, partner and stakeholder goals.

Leading commercial contractors are partnering with Computer Guidance Corporation, the construction industry's premier provider of cloud computing, business automation, data analytics and digital workflows. With eCMS v.4.2, these organizations are able to protect their market share, differentiate their project delivery and protect against the perils of disconnected systems with inaccurate, outdated or inaccessible information.

eCMS creates proactive decision makers by offering secure, real-time content at the precise point of need. And, cloud computing delivers high availability and scalability while opening doors to in-depth automation and heightened data analytics. eCMS' web-based platform further drives user-friendly, on-demand access to business-critical data anytime and anywhere.

By efficiently managing the mission-critical data that is captured, created, modified, shared and stored during day-to-day activities, contractors can achieve maximum productivity and profit. That's the digital difference delivered through eCMS enterprise-class construction management software for commercial contractors.
